

Proof of Evidence

COO 1

Charlton on Otmoor Parish Council would like to register their concern at Chiltern Rail's proposed closure of Mansmore Lane. (Map included) The lane provides access to two farms and overwintering livestock pens and to land owned by 8 other farmers and smallholders. Four landowners use the lane at least twice a day while others use the lane very regularly. It is also used by horse riders and dog walkers daily. ERM has stated that plenty of notice will be given when closures are required but any closure would be unacceptable.

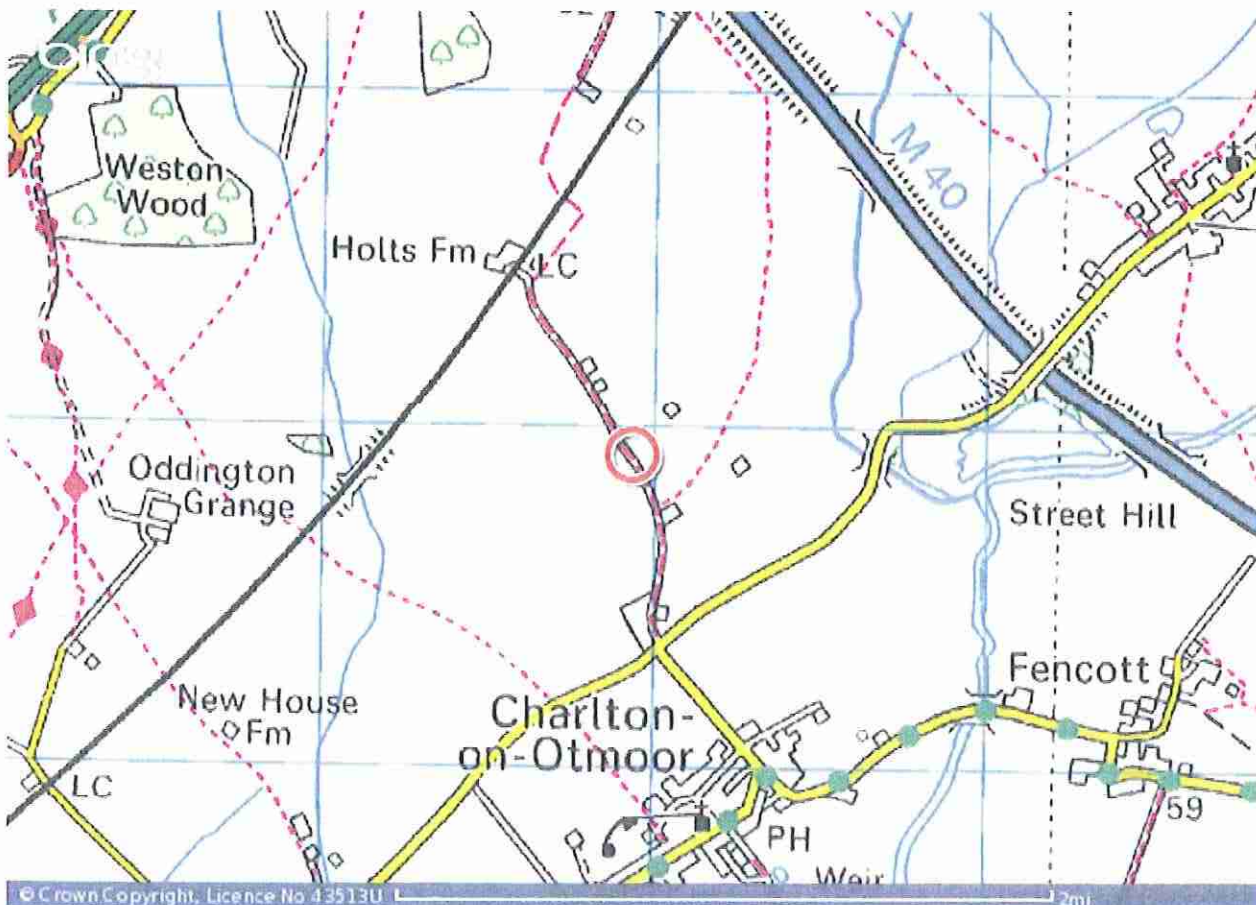

The Parish Council is also concerned about the claim of 'modest delays for road users' using London Road and the level crossing close to Bicester Town Station. We have been told that traffic models show that the delays will not be 'too inconvenient' but this is meaningless. As Bicester is our nearest market town this route is the principle point of egress for our community and we must be the judge the levels of inconvenience. No detailed consultation with locally affected residents has been made and so we have no way of knowing how severely the traffic will be affected.
