Hello,

I am writing this message as I only found out yesterday about the Evergreen 3 project, despite the fact that I live about 10m from the rail line on a residential mooring for narrow boats. There are a large number of house boats on residential moorings adjacent to the track in Oxford and Wolvercote, however we have not been informed about the project and what impact it will have and I wish to make a representation. Though I am not opposed to increased passenger and freight trains per se, I am highly concerned about the level of traffic and how this will affect those of us living just next to the line.

Kind regards,

Dr Corri Waitt
